SUMMARY

AI Engineer and full-stack developer at TeleTech, building and shipping web and mobile products since 2020: TypeScript, React and Next.js on the front end, Node.js, Laravel/PHP and Python on the back end, PostgreSQL, MySQL, Redis and Firebase for data, and Flutter for mobile. I deploy and run what I build with Docker, from static hosting to VPS, dedicated servers and VMware ESXi. Available for **part-time remote work, 20–25 hours a week**.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, PHP, Dart, SQL
Front end	React, Next.js, Tailwind CSS, responsive and bilingual (Arabic RTL / English) interfaces
Back end	Node.js, Laravel, REST APIs, third-party API integration
Databases	PostgreSQL, MySQL, SQLite, Redis, Firebase, Cloud Firestore
Mobile	Flutter
DevOps & tooling	Docker, Git, VMware ESXi
Servers & hosting	VPS and dedicated servers, static and shared hosting (Namecheap), Vercel
AI / LLM	LLM API integration, AI-assisted features and automation workflows, prompt engineering

EXPERIENCE

AI Engineer & Full-Stack Software Developer — TeleTech Sep 2026 – Present

Full-time · On-site

- Build AI-powered features and full-stack software, from LLM integration to the web interfaces and APIs around it.

Full-Stack Web & Mobile Developer 2020 – Present

Freelance and project-based · Remote

- Build web applications end to end in TypeScript, with React/Next.js and Tailwind CSS front ends and Node.js or Laravel/PHP back ends.
- Design data models and queries on PostgreSQL, MySQL and SQLite; use Redis for caching and fast lookups.
- Build cross-platform mobile apps with Flutter and Dart, backed by Firebase and Cloud Firestore.
- Integrate LLM APIs into application features and automation workflows (since 2025).
- Containerize apps with Docker and deploy them on VPS, dedicated servers, VMware ESXi hosts and static hosting; version everything in Git.
- Turn business requirements into working features, then test, debug and improve them after launch.

SELECTED PROJECTS

Portfolio & lead pipeline — youssef-portfolio-pi.vercel.app

- Bilingual Arabic/English site (Next.js, TypeScript, Tailwind CSS, GSAP) with a multi-step brief form, schema validation and rate limiting, instant lead alerts through the Telegram Bot API and email, and conversion analytics. Deployed on Vercel.

Sufra — QR menu and WhatsApp ordering (interactive demo) — live demo

- Arabic-first restaurant menu: guests pick sizes and extras and send a ready-written order to the restaurant's WhatsApp.

Maison Ember — e-commerce storefront (interactive demo) — live demo

- Product pages, cart and checkout flow for a handmade-candle brand.

Atlas Console — admin dashboard (interactive demo) — live demo

- Revenue, orders, inventory and staff for a multi-branch retailer, with sortable tables, charts and light/dark themes.

EDUCATION & TRAINING

B.Sc. Computer Science — Modern Academy, Maadi, Cairo (fourth year) 2022 – Present

Training: Digital marketing and media buying (2021–2023)

Languages: Arabic (native) · English (professional working proficiency)
