YOUSSEF ADEL ELSAYED ALI ARAFAT

Full-Stack Developer | AI / LLM Developer | Web Applications | Cybersecurity & Networking

Cairo, Egypt • +20 100 466 2467 • yjou811@gmail.com

PROFESSIONAL SUMMARY

Multidisciplinary Full-Stack Developer and AI/LLM Developer with hands-on software development experience since 2020, specializing in building and improving web and application solutions across frontend and backend layers. Strong practical background in full-stack engineering, AI-powered solutions, LLM integrations, automation workflows, networking, cybersecurity fundamentals, and digital technologies. Experienced across the development lifecycle, from requirements analysis and solution design through implementation, testing, debugging, optimization, and continuous improvement. Highly adaptable, solution-oriented, and comfortable working independently or collaboratively in remote environments.

CORE TECHNICAL EXPERTISE

Full-Stack & Web Development: Full-Stack Development • Web Applications • Frontend & Backend Development • End-to-End Development • REST/API Integration • Responsive Web Development • Debugging • Testing • Troubleshooting • Performance & Quality Improvement

AI / LLM Development: AI-Powered Applications • LLM Applications & Integrations • AI Automation Workflows • Prompt Engineering • AI-Assisted Software Solutions • AI Workflow Design • LLM API Integration

Networking: Computer Networking Fundamentals • Network Architecture • TCP/IP Concepts • Network Troubleshooting • Infrastructure Fundamentals • Application/Network Interaction

Cybersecurity: Cybersecurity Fundamentals • Web/Application Security • Network Security Fundamentals • Security Testing Concepts • Vulnerability & Risk Concepts • Security-Focused Labs

Digital Technology: Digital Marketing Fundamentals • Media Buying • Digital Advertising • Technology & Business Integration

PROFESSIONAL EXPERIENCE

FULL-STACK WEB & APPLICATION DEVELOPER

2020 – Present | Remote / Freelance / Project-Based

- Design, develop, test, and improve full-stack web and application solutions across frontend and backend layers.
- Translate functional requirements and business needs into practical technical implementations.
- Work throughout the software development lifecycle, including requirements analysis, solution planning, implementation, testing, debugging, and refinement.
- Integrate APIs and external services where required and troubleshoot application issues through structured root-cause analysis.
- Improve functionality, usability, maintainability, and technical quality through continuous iteration.
- Work independently on development tasks while adapting quickly to new frameworks, tools, technologies, and project requirements.
- Apply knowledge from AI, networking, and cybersecurity to strengthen the reliability and overall quality of software solutions.

AI / LLM DEVELOPER

2025 – Present

- Develop and experiment with AI-powered software solutions and LLM-based applications.
- Integrate Large Language Models into practical software workflows and application features.
- Design AI-assisted workflows for automation, information processing, and application functionality.
- Work with modern LLM capabilities and APIs to create application-oriented solutions.
- Explore prompt engineering, structured AI workflows, and practical LLM integration techniques.
- Combine software engineering with AI capabilities to build useful and maintainable application concepts.

NETWORKING & CYBERSECURITY

2024 – Present

- Develop practical knowledge of computer networking, infrastructure, network architecture, and troubleshooting.
- Apply cybersecurity principles through hands-on technical labs and security-focused projects.
- Explore application security, network security, vulnerabilities, and common security concepts.
- Analyze relationships between applications, networks, infrastructure, and security controls.

DIGITAL MARKETING / MEDIA BUYER

2021 – 2023

- Completed professional training in digital marketing and media buying.
- Developed practical understanding of digital advertising, campaign structures, and marketing fundamentals.

- Built business-oriented digital knowledge alongside software development experience.

SELECTED PROFESSIONAL CAPABILITIES

- Software Engineering: Requirements Analysis • Architecture & Implementation • API/Service Integration • Testing • Debugging • Troubleshooting • Continuous Improvement
- AI Engineering: LLM Applications • AI Integrations • AI Automation • Prompt Engineering • AI Workflows
- Engineering Mindset: Analytical Problem Solving • Systematic Troubleshooting • Cross-Domain Thinking • Fast Technology Adaptation • Independent Learning

EDUCATION

BACHELOR OF COMPUTER SCIENCE

Modern Academy | 2022 – Present

Fourth-year Computer Science student with a multidisciplinary technical focus spanning software engineering, full-stack development, artificial intelligence, LLM applications, networking, cybersecurity, and application development.

PROFESSIONAL TRAINING & DEVELOPMENT

- Full-Stack Web & Application Development: Professional training and extensive hands-on project-based development experience.
- AI & LLM Development: Ongoing professional development and hands-on work with AI-powered applications, LLM integrations, and AI workflows since 2025.
- Networking: Structured technical training and practical networking development since 2024.
- Cybersecurity: Structured training, technical labs, and security-focused exercises since 2024.
- Digital Marketing & Media Buying: Professional training and practical experience developed during 2021–2023.

PROFESSIONAL STRENGTHS

- Strong analytical and problem-solving ability • Multidisciplinary technical background • Solution-oriented engineering approach
- Ability to understand systems from both software and infrastructure perspectives • Fast learner • Adaptable to new technologies
- Comfortable working independently and in remote/distributed environments • Strong attention to technical detail

LANGUAGES

Arabic: Native English: Professional Working Proficiency

AVAILABILITY

Remote • Full-Time • Part-Time • Freelance • Software Engineering • Full-Stack Web Development • AI / LLM Development
